

## THE ENERGY DIVISION OF GALILÉ GROUP EXHIBITING AT THE WORLD NUCLEAR EXHIBITION AT BOURGET (93)

The two entities of Galilé's Energy Division, CLM and PEINTA, will be at the World Nuclear Exhibition Fair - WNE 2016 taking place **28-30 June 2016 at Paris-Le Bourget (stand 2B-P39)**.

**Renaud Gaudillière**, managing director of the Energy division, **Christophe de Sansal**, CLM assistant director and **Olivier Tremeau**, PEINTA assistant director, wanted to be present in person to explain the synergies that they develop, to reaffirm their expertise and to demonstrate the strength of the Energy division through the enhancement of complementary services.

**CLM** (1 site in Bourgogne), nuclear OEM (Original Equipment Manufacturer) designs, manufactures and assembles boilerwork and customized mechanical systems for research centers, civilian and military facilities, and for dismantling and waste management. CLM has developed its expertise on nuclear confinement and special tooling issues.

Client references: CEA (DAM and DEN projects), AREVA (GB2, EPR Taishan, dismantling of Creys Malville), EDF (LIDEC laboratory).

**PEINTA** (1 site in Auvergne) designs and manufactures custom-made electromechanical solutions (component integration and specific casings development). PEINTA has shown its know-how in designing, mechanical and electrical engineering, manufacturing (sheet metal working, mechanized welding, painting, wiring, integration), testing, enhanced quality assurance.

Client references: COFELY GDF SUEZ (DUS project - plug FARN), AREVA (distribution equipment and submarine converters), SCHNEIDER ELECTRIC (mobile unit integration and shelters)

### The strengths of the Energy division:

- **Leader** as an Industrial OEM of bespoke equipment classified as unsafe or not
- An offer for **demanding sectors**: Defense, Nuclear and Energy
- An **industrial structure** enabling high responsiveness to offer a fast, highly qualified, custom-made and efficient response
- A **rare know-how** in France combining mechanical and electrical knowledge, understanding principles of codes, precise mechanized welding, qualified painting, robust quality and safety culture
- A division with **100 professionals** representing 25% of Galilé's turnover

**The Energy division is a member of CSFN  
(Comité Stratégique de la Filière Nucléaire - Strategic Comity for the Nuclear Sector)**

### Galilé in a word

Founded and managed by Eric Michoux, its CEO, Galilé is an independent industrial group, which supports the "French Producing". Operating internationally, the group is composed of 3 major divisions: Industry (9 companies), Energy (2 companies) and Material Handling (5 companies). Thus the Galilé group represents 16 companies, 400 jobs and a 57 M€ turnover in 2015. In the short term, the group intends to buy 2 new companies, generating a total workforce of 650 employees in 2016. The head office of Galilé group is in Alésia, Bourgogne (71).
